

	<u>Wednesday 6.11.</u>	<u>Thursday 7.11.</u>	<u>Friday 8.11.</u>	<u>Saturday 9.11.</u>
09:00 - 10:00	-	<b>Loïc Foissy</b> <i>Algebraic and combinatorial aspects of quantum field theory</i>	<b>Massimiliano Gubinelli</b> <i>Paracontrolled distributions</i>	<b>Frédéric Menous</b> <i>Renormalization and dynamical systems</i>
10:30 - 11:30	-	<b>Massimiliano Gubinelli</b> <i>Paracontrolled distributions</i>	<b>Frédéric Menous</b> <i>Renormalization and dynamical systems</i>	<b>Hendrik Weber</b> <i>Non-linear SPDEs, controlled distributions and renormalisation</i>
11:45 - 12:45	-	<b>Frédéric Menous</b> <i>Renormalization and dynamical systems</i>	<b>Hendrik Weber</b> <i>Non-linear SPDEs, controlled distributions and renormalisation</i>	<b>Loïc Foissy</b> <i>Algebraic and combinatorial aspects of quantum field theory</i>
14:00 - 15:00	<b>13:30 Uhr</b> <b>Christian Brouder</b> <i>Colloquium 1: S-matrix and renormalisation</i>	<b>Mohamed Belhaj Mohamed</b> On renormalization groups and beta functions in a Hopf-algebraic context	<b>Loïc Foissy</b> <i>Algebraic and combinatorial aspects of quantum field theory</i>	<b>Jérémie Unterberger</b> <i>tba</i>
15:15 - 16:15	<b>15:00 Uhr</b> <b>Hendrik Weber</b> <i>Colloquium 2: SPDEs, criticality and renormalisation</i>	<b>Erik Panzer</b> <i>Renormalization by kinematic subtraction and Hopf algebras</i>	<b>Peter Imkeller</b> <i>A Fourier analytic approach to rough paths</i>	-
16:30 - 17:30	-	<b>Nicolas Perkowski</b> <i>Paracontrolled distributions and the parabolic Anderson model</i>	<b>Viet Dang Nguyen</b> <i>Renormalised products of distributions which fail to satisfy the Hörmander condition</i>	-
		<b>Conference dinner</b>
